Scented Garden

by Deborah Edwards

The sweet scent of early summer flourishes in this fanfare of flora and foliage, butterflies and bees created by Deborah Edwards. Beautifully illustrated with attention every detail, Scented Garden offers a wide variety of prints in an updated palette featuring saturated pastels with gray. Some prints are packed, while others more open, some have light grounds, while others darker grounds, some are small scale, while others are large scale, but most are multi-directional and easy to use. In addition, Scented Garden includes a beautiful border print that ties all of the elements together and a barcode stripe that is ideal for bidding. As well, there are simple prints including, tossed bees, butterflies and leaves, script patterns and lace. To complete the collection a selection of Toscana prints coordinate beautifully.
